

JFCFM10116 Certificate I in Joinery, Furniture and Cabinet Making (Furniture Making)

The Certificate 1 in Joinery, Furniture and Cabinet Making (Furniture Making) is developed to improve on current trainings with very little focus on Joinery training in Luganville and SANMA province. SANMA province has the potential resources through its forest products but there is very little focus on the human resources development for the Joinery sector. The need of the course was verified through a literature review on existing educational documents including the SANMA Provincial Skills Plan and a snap shot community and industry consultation to confirm the need for this course. The qualification is aimed to help student for community life so graduates may utilize the skills and knowledge and develop some form of productive community livelihood activities using forest products in their communities and provinces. The course will also be offered by TVET institutions if needed and will be offered to communities as short courses to improve knowledge and skills that are currently practiced within the joinery sector particularly in the area of furniture making.

Description

Course Accreditation Date: 24th November 2016

Course Expiry Date: 24th November 2021

Course Code: JFCFM10116

Course Owner: St.Michel Technical College

This course is current.

The entry requirements for enrollment into this course are Year 10 leaving certificate with good command of language literacy and numeracy.1 or 2 years of experience in respective industry. At least 16 years of age and 1 year experience in community operations (Short Course)

Certificate I in Joinery, Furniture and Cabinet Making (Furniture Making) will develop basic skills and knowledge for individuals to make basic furniture in a joinery workshop or in communities.

It will also contribute to produce the following;

- Prepare vocational students for community life before they exit from the conventional education system into their respective communities
- Safe and correct use of hand and electrical tools
- Read and interpret basic furniture plans
- Make basic furniture
- Graduates will utilize the knowledge and skills in Joinery to motivate them to participate in possible Joinery business using free resources within their communities
- Graduates find employment opportunities in Joinery workshops

This qualification will pave the interest and pathway towards further education and training in the joinery, furniture and cabinet making or building construction sector.

Students will receive a Statement of Attainment when completing some units of the qualification.
